Sara Mansouri

Backend & Node.js Developer

sara.mansouri@example.com | +33 6 12 34 56 78 | Paris, France | github.com/sara-dev

Professional Summary

Junior Backend Developer with strong foundations in Node.js, Express.js, MongoDB, and REST API engineering. Passionate about API design, authentication systems, data modeling with Mongoose, and server optimization. Experienced in testing with Mocha/Jest and containerized workflows with Docker.

Backend Technical Skills

Languages & Frameworks: Node.js, Express.js, JavaScript (ES6+), TypeScript, Python basics
Databases: MongoDB, Mongoose ODM, Redis caching basics, PostgreSQL fundamentals
Architecture & Security: RESTful API Design, JWT, OAuth 2.0 basics, Helmet, CORS, Rate Limiting
DevOps & Tools: Docker, Git, GitHub Actions CI/CD, Postman, Linux CLI

Backend Projects

E-Commerce RESTful Microservices API

Node.js, Express.js, MongoDB, Docker | 2024

• Designed modular REST API handling user auth, product catalogs, and order workflows.
• Implemented indexing and aggregation pipelines in MongoDB, reducing query latency by 35%.
• Containerized the application using Docker and configured CI pipeline with GitHub Actions.

Secure Authentication & File Vault

Node.js, Express, JWT, Multer, bcrypt | 2023

• Created an encrypted document repository with role-based access control and JWT token refresh.
• Implemented rigorous file validation, MIME verification, and virus scanning stubs.

Education

Bachelor of Science in Computer Science

University of Paris-Saclay | 2021 - 2024
